EPDM

Our EPDM rubber sheeting is a synthetic rubber that is perfect for outdoor applications. It has excellent resistance to water, ozone, ageing and injurious environmental conditions. Our EPDM also has a wide operating temperature range and is especially effective at high ambient temperatures.

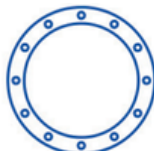

EPDM's biggest advantage lies in its weatherproofing and resistance to steam and heat, making it a popular choice for applications such as weather seals and strips, O-rings, hoses, grommets, and sleeves.
